ABOUT

Information Technology student at HCMUE with hands-on experience building automation workflows, internal tools and Docker-based pipelines. Skilled in Python, JavaScript, API integration, n8n, Telegram Bot API and AI coding tools. Passionate about using software and AI automation to improve operations, reduce repetitive work and build reliable systems.

EXPERIENCE

n8n & AI Automation Project Builder

Personal Project

- Built n8n workflows to receive Telegram commands, route requests, call child workflows and return job reports
- Connected n8n with Docker-based media pipelines through HTTP bridge services
- Used OpenClaw/CLIPProxy and AI tools to rewrite prompts, debug workflow errors and improve automation reliability
- Designed job_id, status JSON, logs and output folders so each automation job can be tracked and fixed easily
